

Business Application Systems

bApps Premium Series Products

bApps – Finance is a comprehensive, easy to use financial accounting application. It is available as a packaged standalone product. It is also available integrated in bApps – Contracting and bApps – Trading products. bApps – Finance runs on top of Oracle 10g Database Express edition software and leverages the power of Oracle Database for high performance.

bApps – Stores is a product for inventory management. Support for multiple stores as well as customer supplied item stores makes it a complete warehouse management system. Raising purchase order provision included in the product to track receipts against a Purchase Order where there is no integrated system in place.

bApps – Contracting is a complete product with the core modules of an ERP system in place, ie Finance, Purchase, Stores and Sales Order Processing. It comes with all settings preconfigured and can be used immediately after installation. bApps – Contracting is an easy to use application which saves a lot of time for the end user in preparing documents like Quotation, Orders, Invoices etc. Items flow from one document to another transparently reducing the manual entry time.

Finance	<input type="checkbox"/>	Stores	<input type="checkbox"/>	Contracting	<input type="checkbox"/>
Purchase	<input type="checkbox"/>	Trading	<input type="checkbox"/>		

bApps – Purchase is a product suitable for purchase department of any organisation. This is useful where there is no comprehensive system available for managing business as well as there is no budget for a complete system in place. Still the purchase department can go ahead with this single module product managing entire processes in the purchase.

bApps – Trading is a product intended for organisations involved in Trading activities and contain the core modules of an ERP system, ie Finance, Purchase, Stores and Sales Order Processing. It comes with all settings preconfigured and can be used immediately after installation. bApps – Trading focus on materials sales and has credit as well as cash invoice options. It is flexible enough for most of the demanding requirements of a trading company.
