

**Business Application Systems**  
bApps Premium Series Products

[www.gbrconsult.com](http://www.gbrconsult.com)

bApps Business Solutions is a suit of products to serve the needs of small and medium enterprises.

This product suit covers a variety of business needs providing normal workflow of various departments in an organisation.

bApps Business Solutions is available as enterprise system as well as modularised systems catering to the needs of individual departments.

## bApps Product family now consists of:

**bApps - Finance:** Easy to use and scalable Financial Accounting Solution

**bApps - Purchase:** Simple and Complete solution for procurement process

**bApps - Stores:** Flexible Inventory Management solution

**bApps - Contracting:** Project based enterprise system suitable for contracting companies to track Stock, Revenue and Expenses, Purchasing and Subcontracting activities.

System covers integrated assemblies of Sales Order Processing, Purchase, Inventory with Project Stock allocations, Subcontracting and automated postings to Finance.

**bApps - Trading:** Enterprise system covering Finance, Purchase, Stores and Sales including Counter Sale with Cash/Credit Invoices

bApps is powered by Oracle™ database. Oracle 10g Database Express Edition software is available along with the product.

## How it Helps

In today's fast paced business scenario, requirements do change often and businesses become flexible to meet the demands of the market.

Rigid ERP systems does not allow you to track your business the way it happen. bApps is designed to give you maximum flexibility to meet such demands, at the same time to have control points to analyse deviations.

Configurable parameters and approval levels help you to tune the system according to the changing business requirements.

System allows correction of documents through amendment procedures

bApps is easy to use and self manageable by the users reducing redundant processes and data entry.
