

I2 methodology includes a complete and thorough study that assesses time, cost, risks, and benefits of all possible options. Our expertise helps clients configure and run their software and databases across a wide variety of infrastructures and networks. Finally, our data conversion expertise, ETL, and data transformation knowledge can help customers migrate their data from heritage legacy systems to their new ERP systems.

Our commitments to quality start with our consultants of which more than 90% are our employees. The company provides ongoing support to our consultants during the engagements to enhance our client's and our consultant's success. The firm has an internal PeopleSoft training center for our employees to assure that they continue to enhance their skills and stay with changes.

I2's functional and technical experts have several years of experience in many of the following areas

- » Application Integration
- » Customer Relationship Management
- » Financial Management Solutions

Looking for IT Consulting or Outsourcing Services ?

Originated in the world of consulting, I2IT solutions has established itself as an accomplished service provider. We offer clients individualized care to help them optimize their businesses. Our expertise helps us provide the highest quality of service to top clients from many different sectors in a wide variety of industries. Our services include management and technology consulting, allowing us to help your organization transform their technologies and streamline their operations. Aligning with our vision, we have accumulated significant experience in techno-functional practices.

Vision

Perseverance towards providing consistent consulting services and ensuring delivery in its absolute sense.

Mission

Our client's needs are our priority. We take it as a challenge to keep up the expectations and have a competitive advantage especially in today's turbulent economic times. I2IT Solutions has established itself as a provider of world class consulting services to industry leaders. With persistent efforts and an indefatigable attitude, we strive to grow by providing novel solutions to complex business challenges. We are committed to the high standards set forth to exceed clients expectations.

Overview

More than ever before, global communication operators and media/content companies are faced with the predicament of defining and proving a convergent value chain, while simultaneously cutting operational costs to meet quarterly targets. The challenge is real and complex, requiring a partner and services model that delivers on both these imperatives.

i2 IT SOLUTIONS practice for communications and media companies delivers the market's most sophisticated mix of consultants, tools, and technologies. Across the segments within this convergent space - including wireless, fixed, satellite, print, broadcast, media, broadband, and Internet - i2 IT SOLUTIONS's experience in shaping and realizing the next-generation value chain for these companies worldwide is practical, reliable, and successful.
